IIBEC Chicago: Laboratory Tour and Education Sessions at UL Solutions

Start Date: 10/6/2026 9:00 AM

End Date: 10/6/2026 1:00 PM

Join the IIBEC Chicago Area Chapter and the IIBEC Wisconsin Chapter for a technical program and guided tour of the UL Solutions laboratory in Northbrook, IL. This special event combines expert presentations with a behind-the-scenes tour, giving attendees a uniqueopportunity to connect the standards and test reports they use in practice with the actual testing methods, equipment, and performance criteria behind them.
Learn how building enclosure assemblies are evaluated for fire, hail, debris, and projectile impact resistance - and see the testing in action.

PROGRAM TOPICS

Fire Resistance of Roofing Systems: UL 790 - Class A, B, and C classification
Hail Impact Testing:UL 2218 - Class 1 through Class 4 ratings
Debris & Projectile Impact Testing for Building Envelope Systems: ASTM E1886/E1996 and UL 1897 (as applicable)

PLUS - A GUIDED UL LABORATORY TOUR
Get an up-close look at UL's state-of-the-art testing facilities and see building enclosure products put to the test.
